## CUSTOMER INFORMATION

Williamson-Dickie Europe Ltd is committed to ensuring that our products are produced in an environmentally responsible manner. From our catalogue products, the INDUSTRY 300 range is manufactured using Oeko-Tex accredited weaving, dyeing and finishing processes. We also ask that all suppliers of our corporate / bespoke product have a current Oeko-Tex certification, which covers products that are supplied to Williamson-Dickie Europe.

Below is some more information on Oeko-Tex.

\*\*\*\*\*

*Confidence in textiles – this has been the motto of the independent test institutes of the International Oeko-Tex® Association since 1992, with their tests for harmful substances according to Oeko-Tex® Standard 100 for textile products of all types which pose no risk whatsoever to health.*

*For companies in the textile and clothing industry, the Oeko-Tex® criteria catalogue provides for the very first time a uniform, scientifically founded evaluation standard for the human ecological safety of textiles, against the background of the globalised and extremely fragmented nature of the textile manufacturing chain.*

*The Oeko-Tex® label indicates to interested end users the additional benefits of tested safety for skin-friendly clothing and other textiles. In this way, the test label provides an important decision-making tool when purchasing textiles.*

*Confidence in textiles – an international synonym for responsible textile production – from the raw material to the finished product on the shop shelves. For industry and retailers throughout the textile manufacturing chain just as well as for users of fashionable, functional, colourful textiles.*
